DETAILED ACTION

1. The Preliminary amendment of 04/10/06 is acknowledged, considered and entered.

Drawings

2. The drawings filed on 04/10/06 are accepted by the Examiner.

Claim Objections

3. Claims 2-16 and 18-25 are objected to because of the following informalities:
The preamble of a claim should begin with "The" or "A". Appropriate correction is required.
4. This application is in condition for allowance except for the following formal matters: The limitation "local estimators (a_{ij} , c_{ij}) recited in claim 1, line 9 is not consistent with the drawings of Fig. 7 J which show c_{ij} combined with δ_{ij} as recited in step g of claim 17. The claim should be amended to recite proper limitation supported by the specification and drawings as explained above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

5. Claims 17-26 are allowable over the prior art of record. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record taken alone and in combination does not disclose "a method of spectral analysis

of a radio frequency ultrasonic signal returned from a structure subjected to an ultrasound examination, comprising determining, for at least some of the points of the sampled and digitized frame, respective interpolating polynomials (PI) which approximate the variation of said spectral coefficients in the various bands into which the radio frequency signal was decomposed; g) for said points, from the coefficients (a.sub.o, . . . a.sub.k) of the interpolating polynomial obtaining a local estimator (c.sub.ij), combining at least two coefficients of different orders (a.sub.o, . . . a.sub.k) of the interpolating polynomial with one another" as recited in claim 17.
